

Next-Generation Messenger

For teams that move fast

What Makes Our Platform Different

Traditional Messengers

- ✗ Basic chat features only
- ✗ No built-in AI integration
- ✗ Separate productivity tools
- ✗ No crypto or financial features

Our Platform

- ✓ Built-in AI Assistant
- ✓ Crypto wallet with a native token
- ✓ Integrated tasks and notes
- ✓ Business spaces for teams

Unified Ecosystem for Business

AI Assistant

Smart assistant for tasks, notes, chat summarization, semantic search, and booking

Crypto Wallet

Built-in crypto wallet with a native token, transfers, bridges, and swaps

Spaces

Workspaces with tools and automation tailored to specific business needs

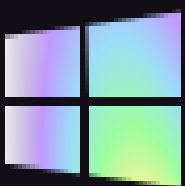

Tasks

Create to-dos, track progress, and automate workflows with AI

Web

Windows

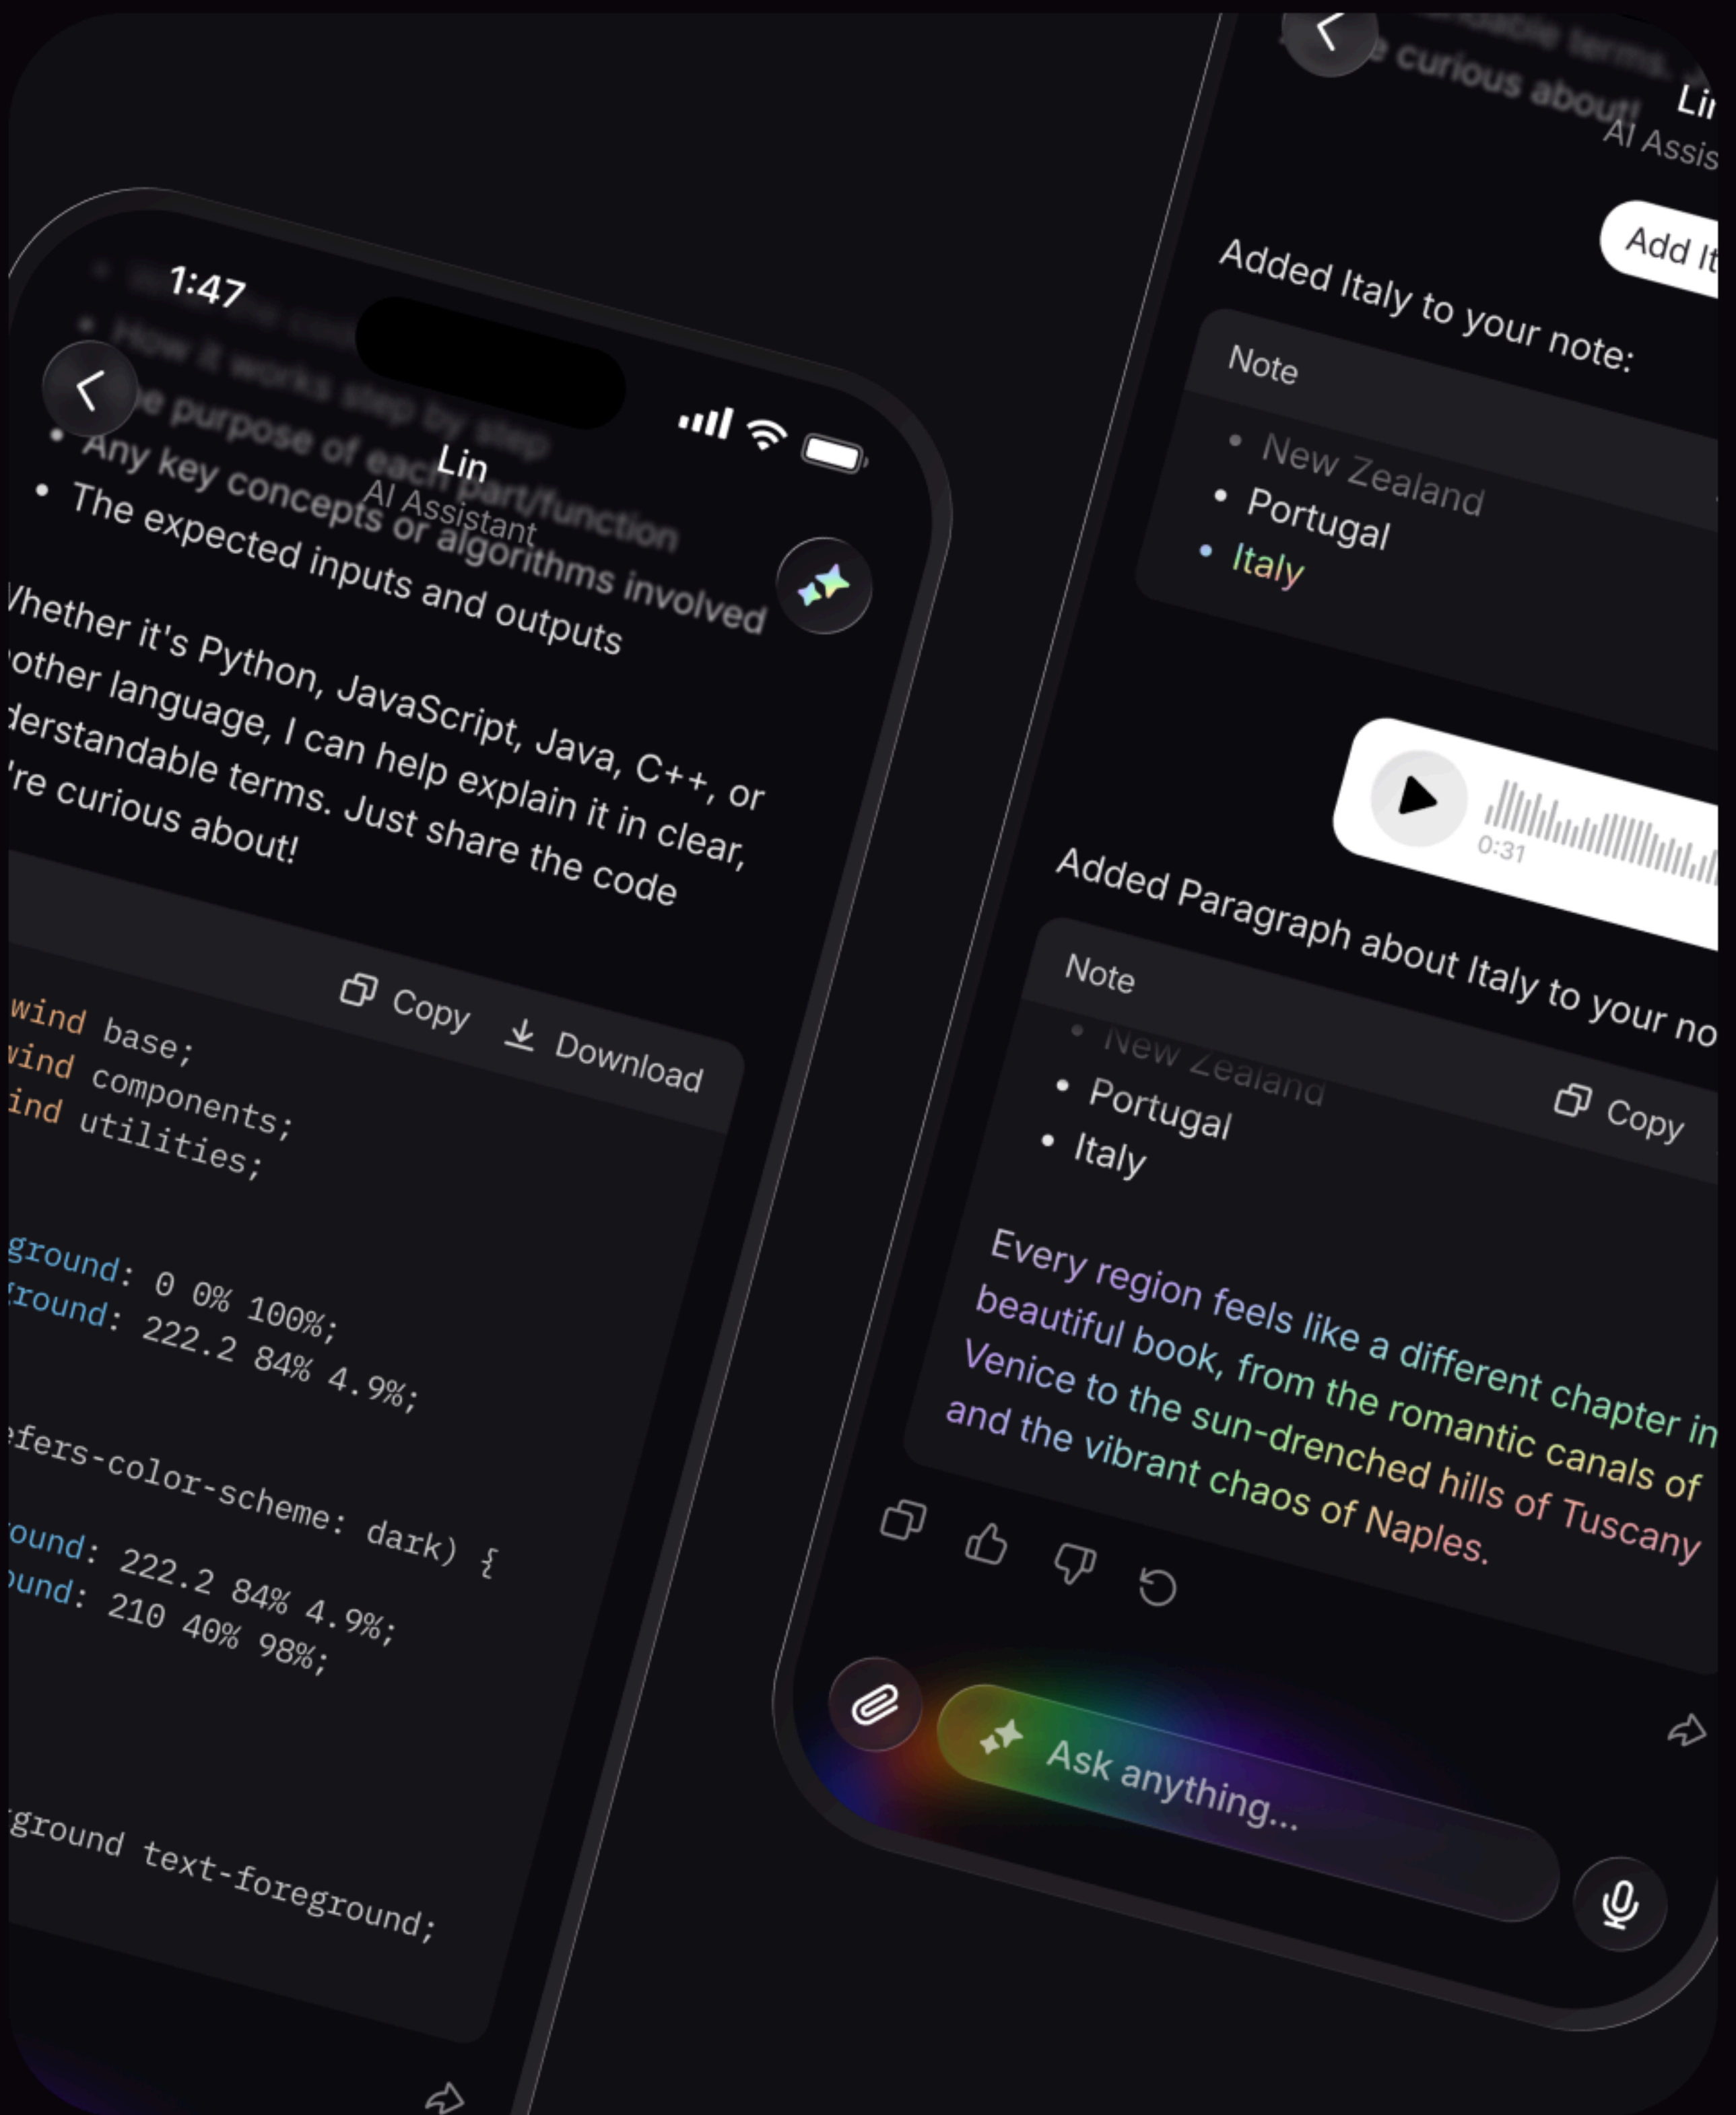

iOS

Android

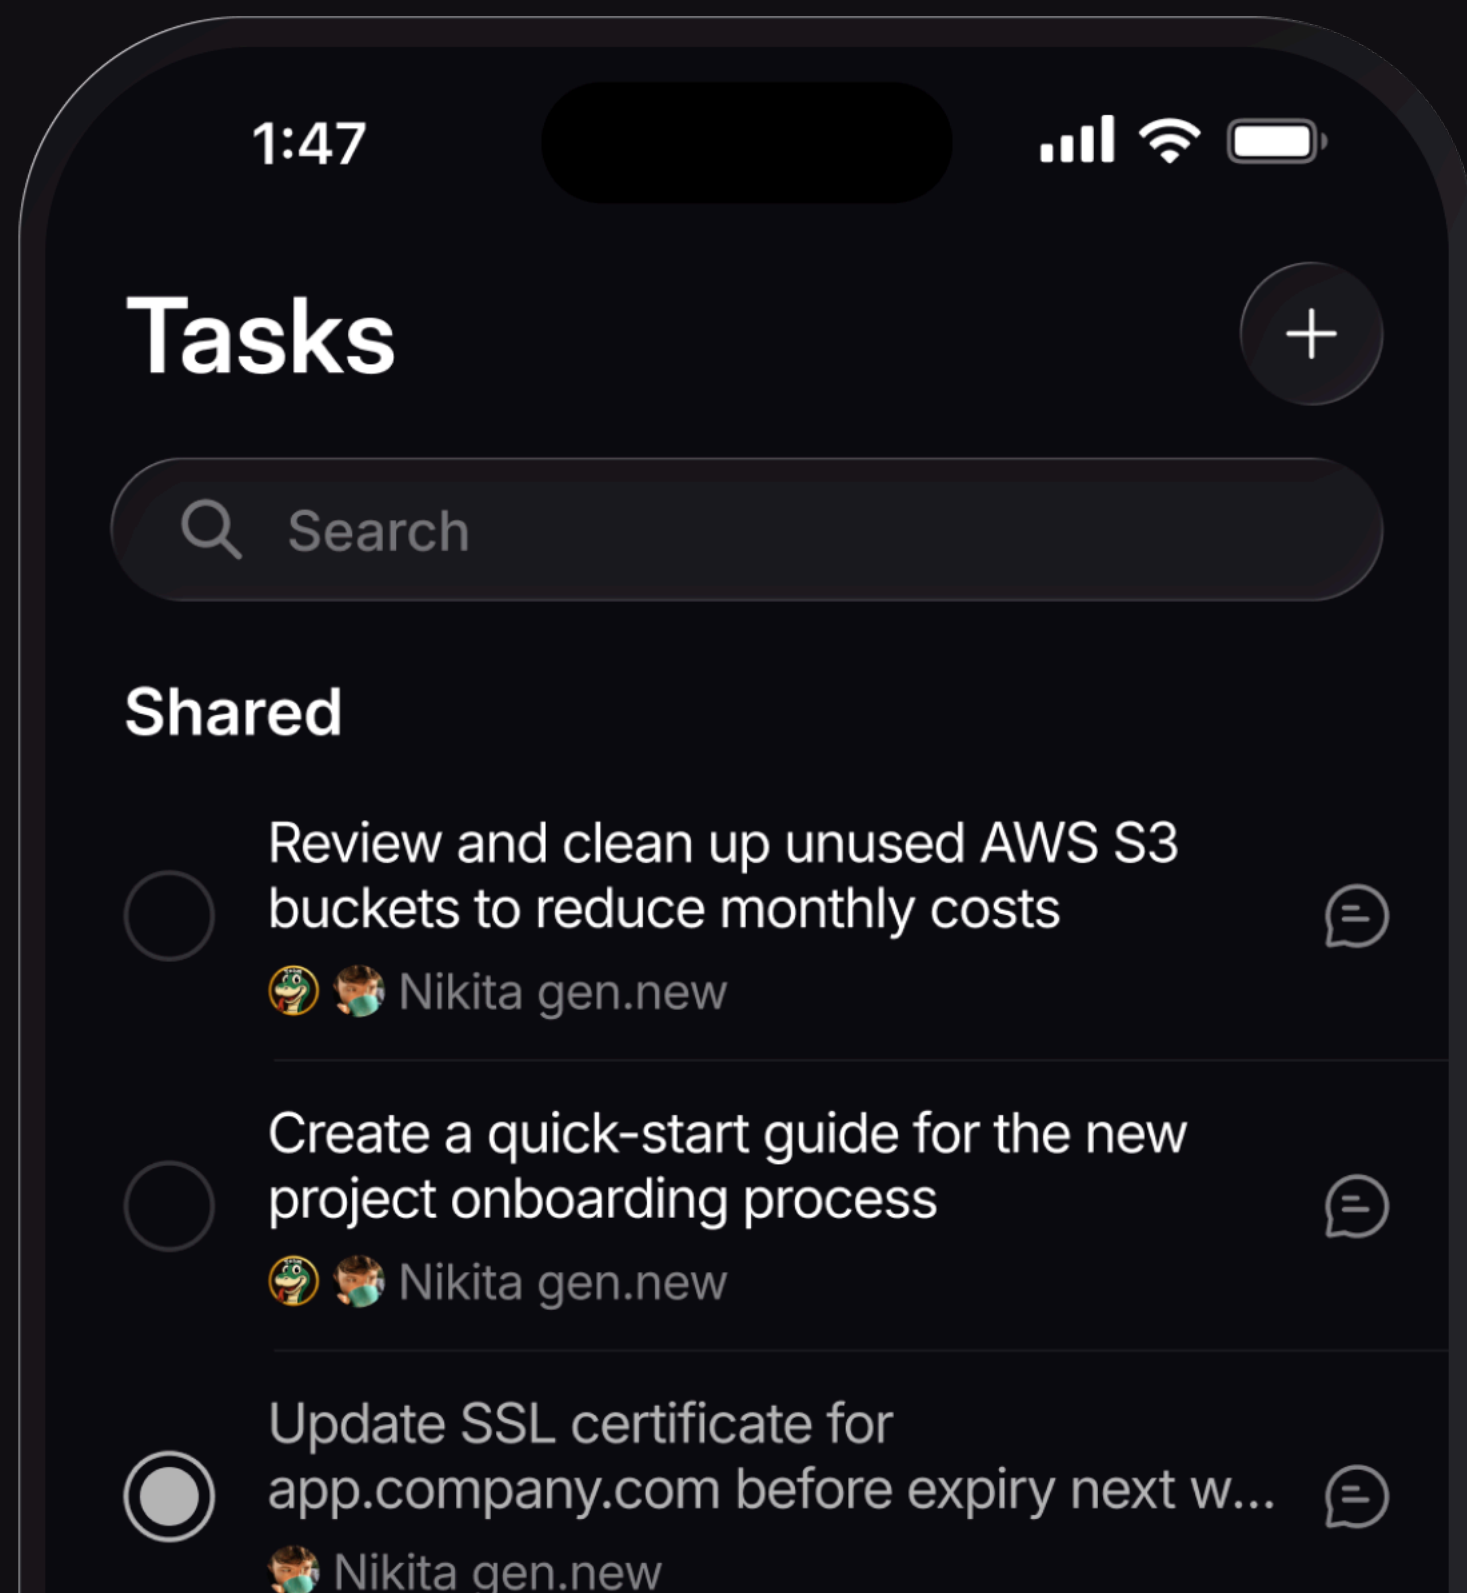

AI Assistant

Your Personal Business Intelligence

Smart notes, tasks, summaries, semantic search, and AI booking — all in one place

Workflow Automation

Task Management

Automatic task creation from chats, smart reminders, prioritization, and calendar integration

Smart Notes

AI organizes thoughts, builds structure, highlights key ideas, and auto-tags content

Semantic Search

Finds information by meaning across chats, notes, tasks, and documents

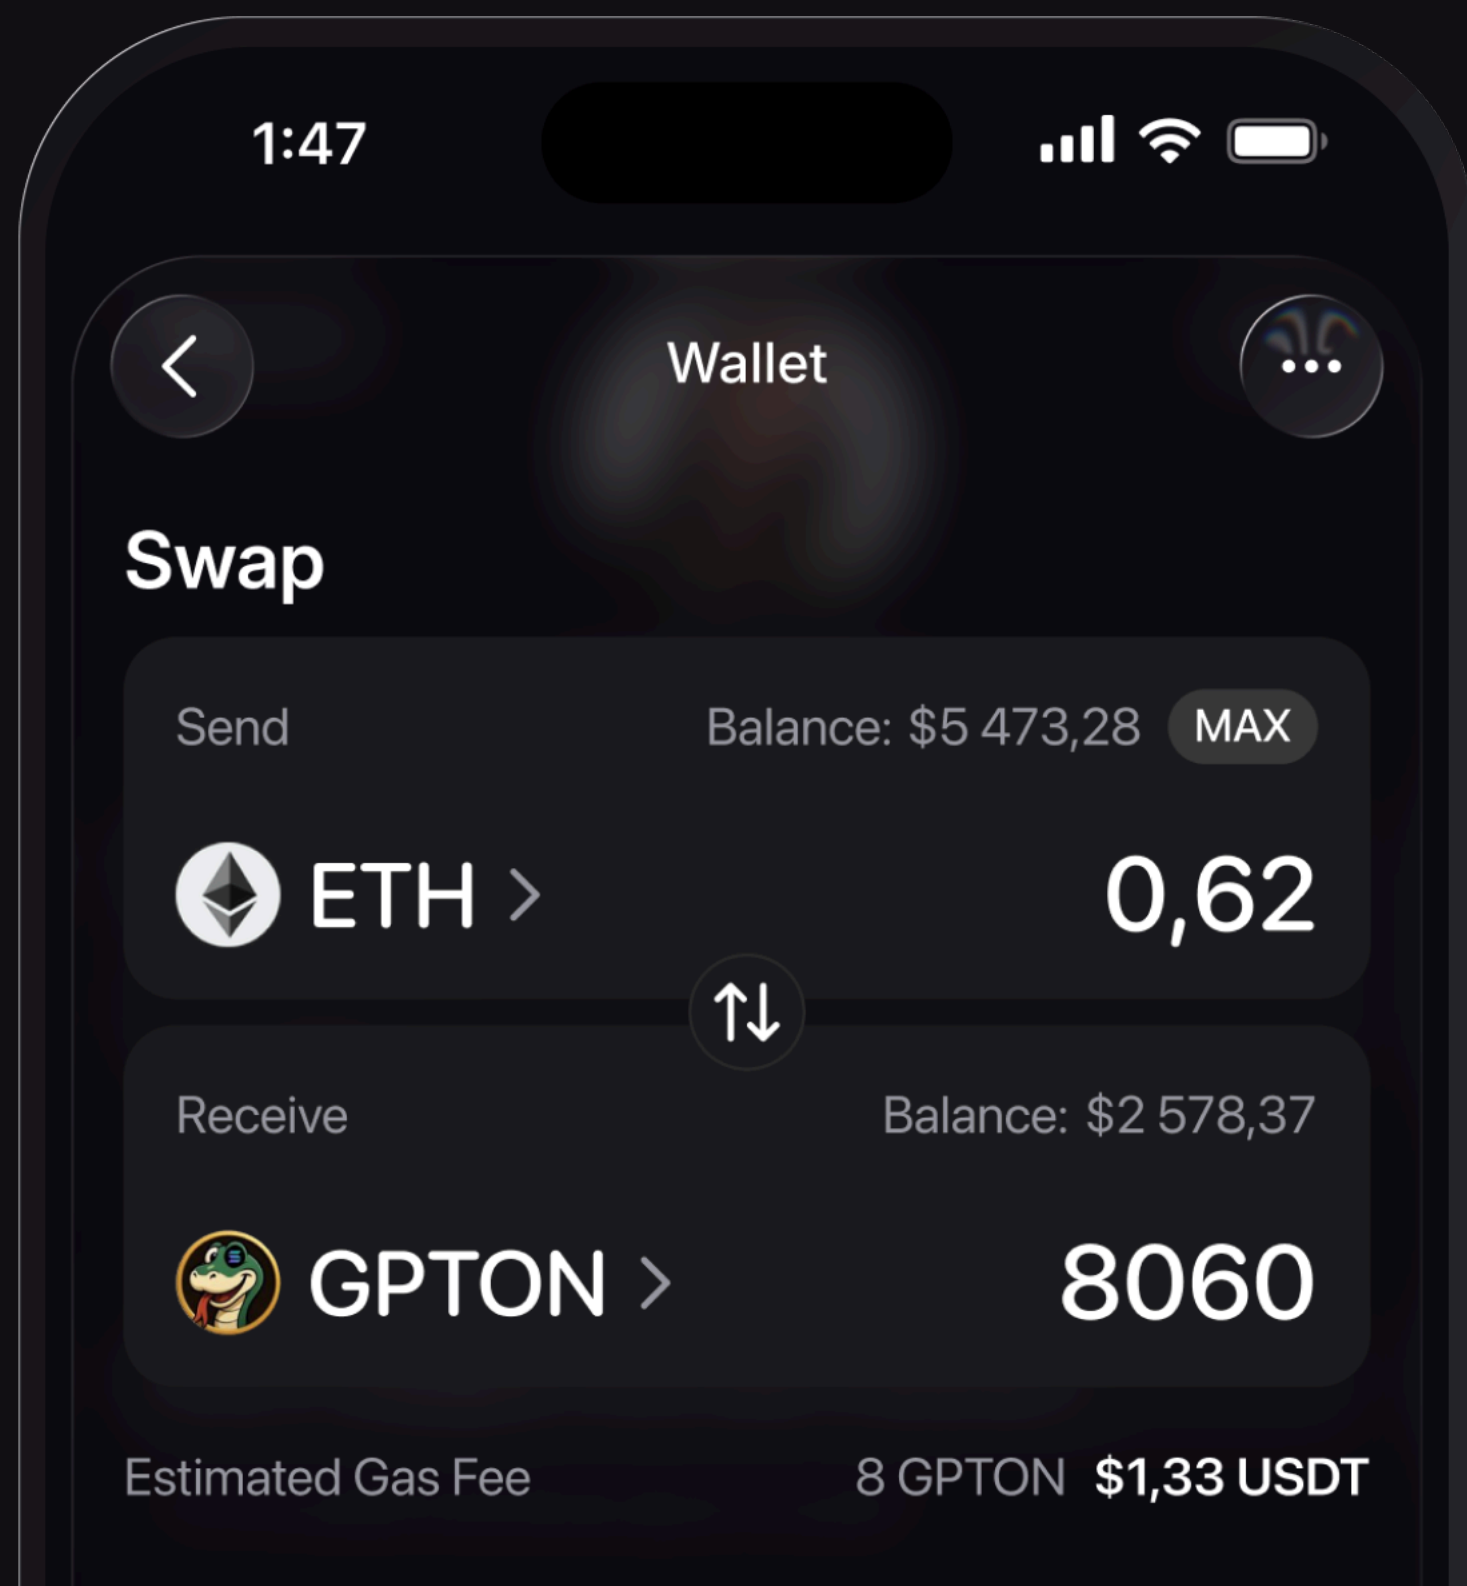

Crypto Wallet

Built-in Payments with a Native Token

Instant transfers, cross-chain bridges, and token swaps with fees from 0.1%

Secure Financial Infrastructure

Instant Transfers

Send funds to contacts directly in chat within seconds, with minimal fees

Cross-Chain Bridges

Seamless asset transfers across blockchains (Ethereum, Solana, Polygon, and more) without leaving the app

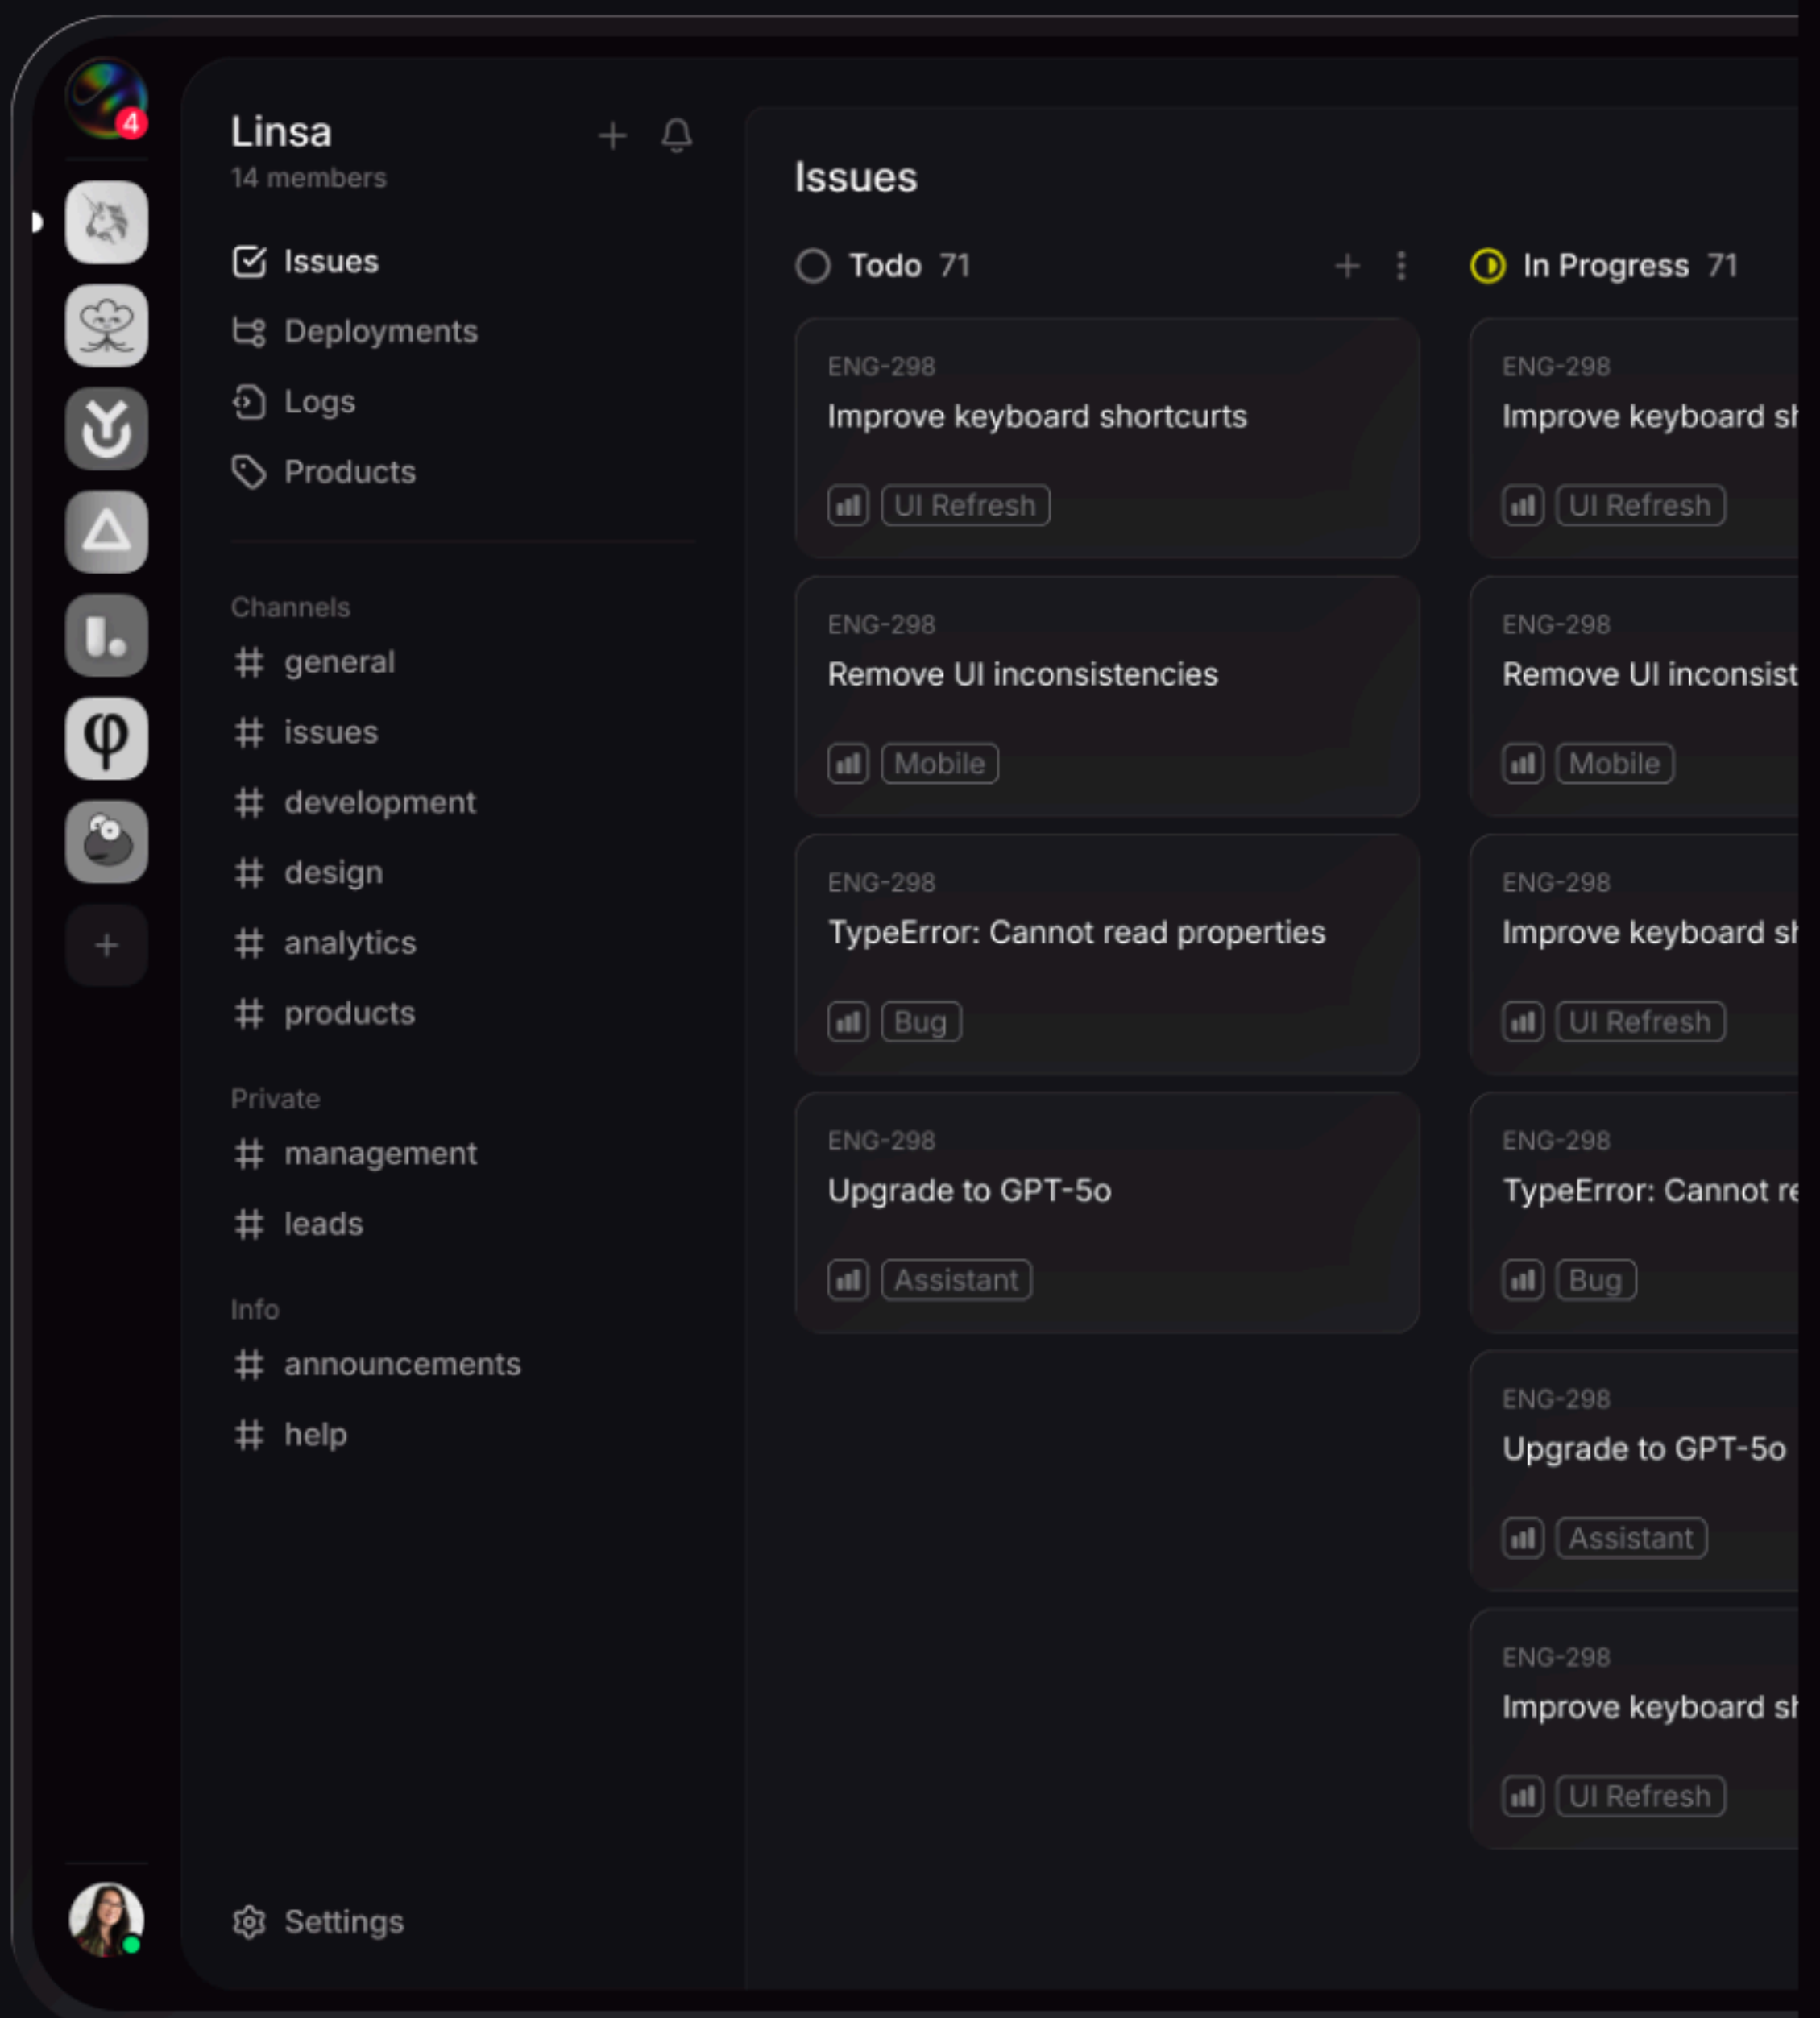

Token Swaps

Instant crypto exchanges at best rates via integrated DEXs, with fees from 0.5%

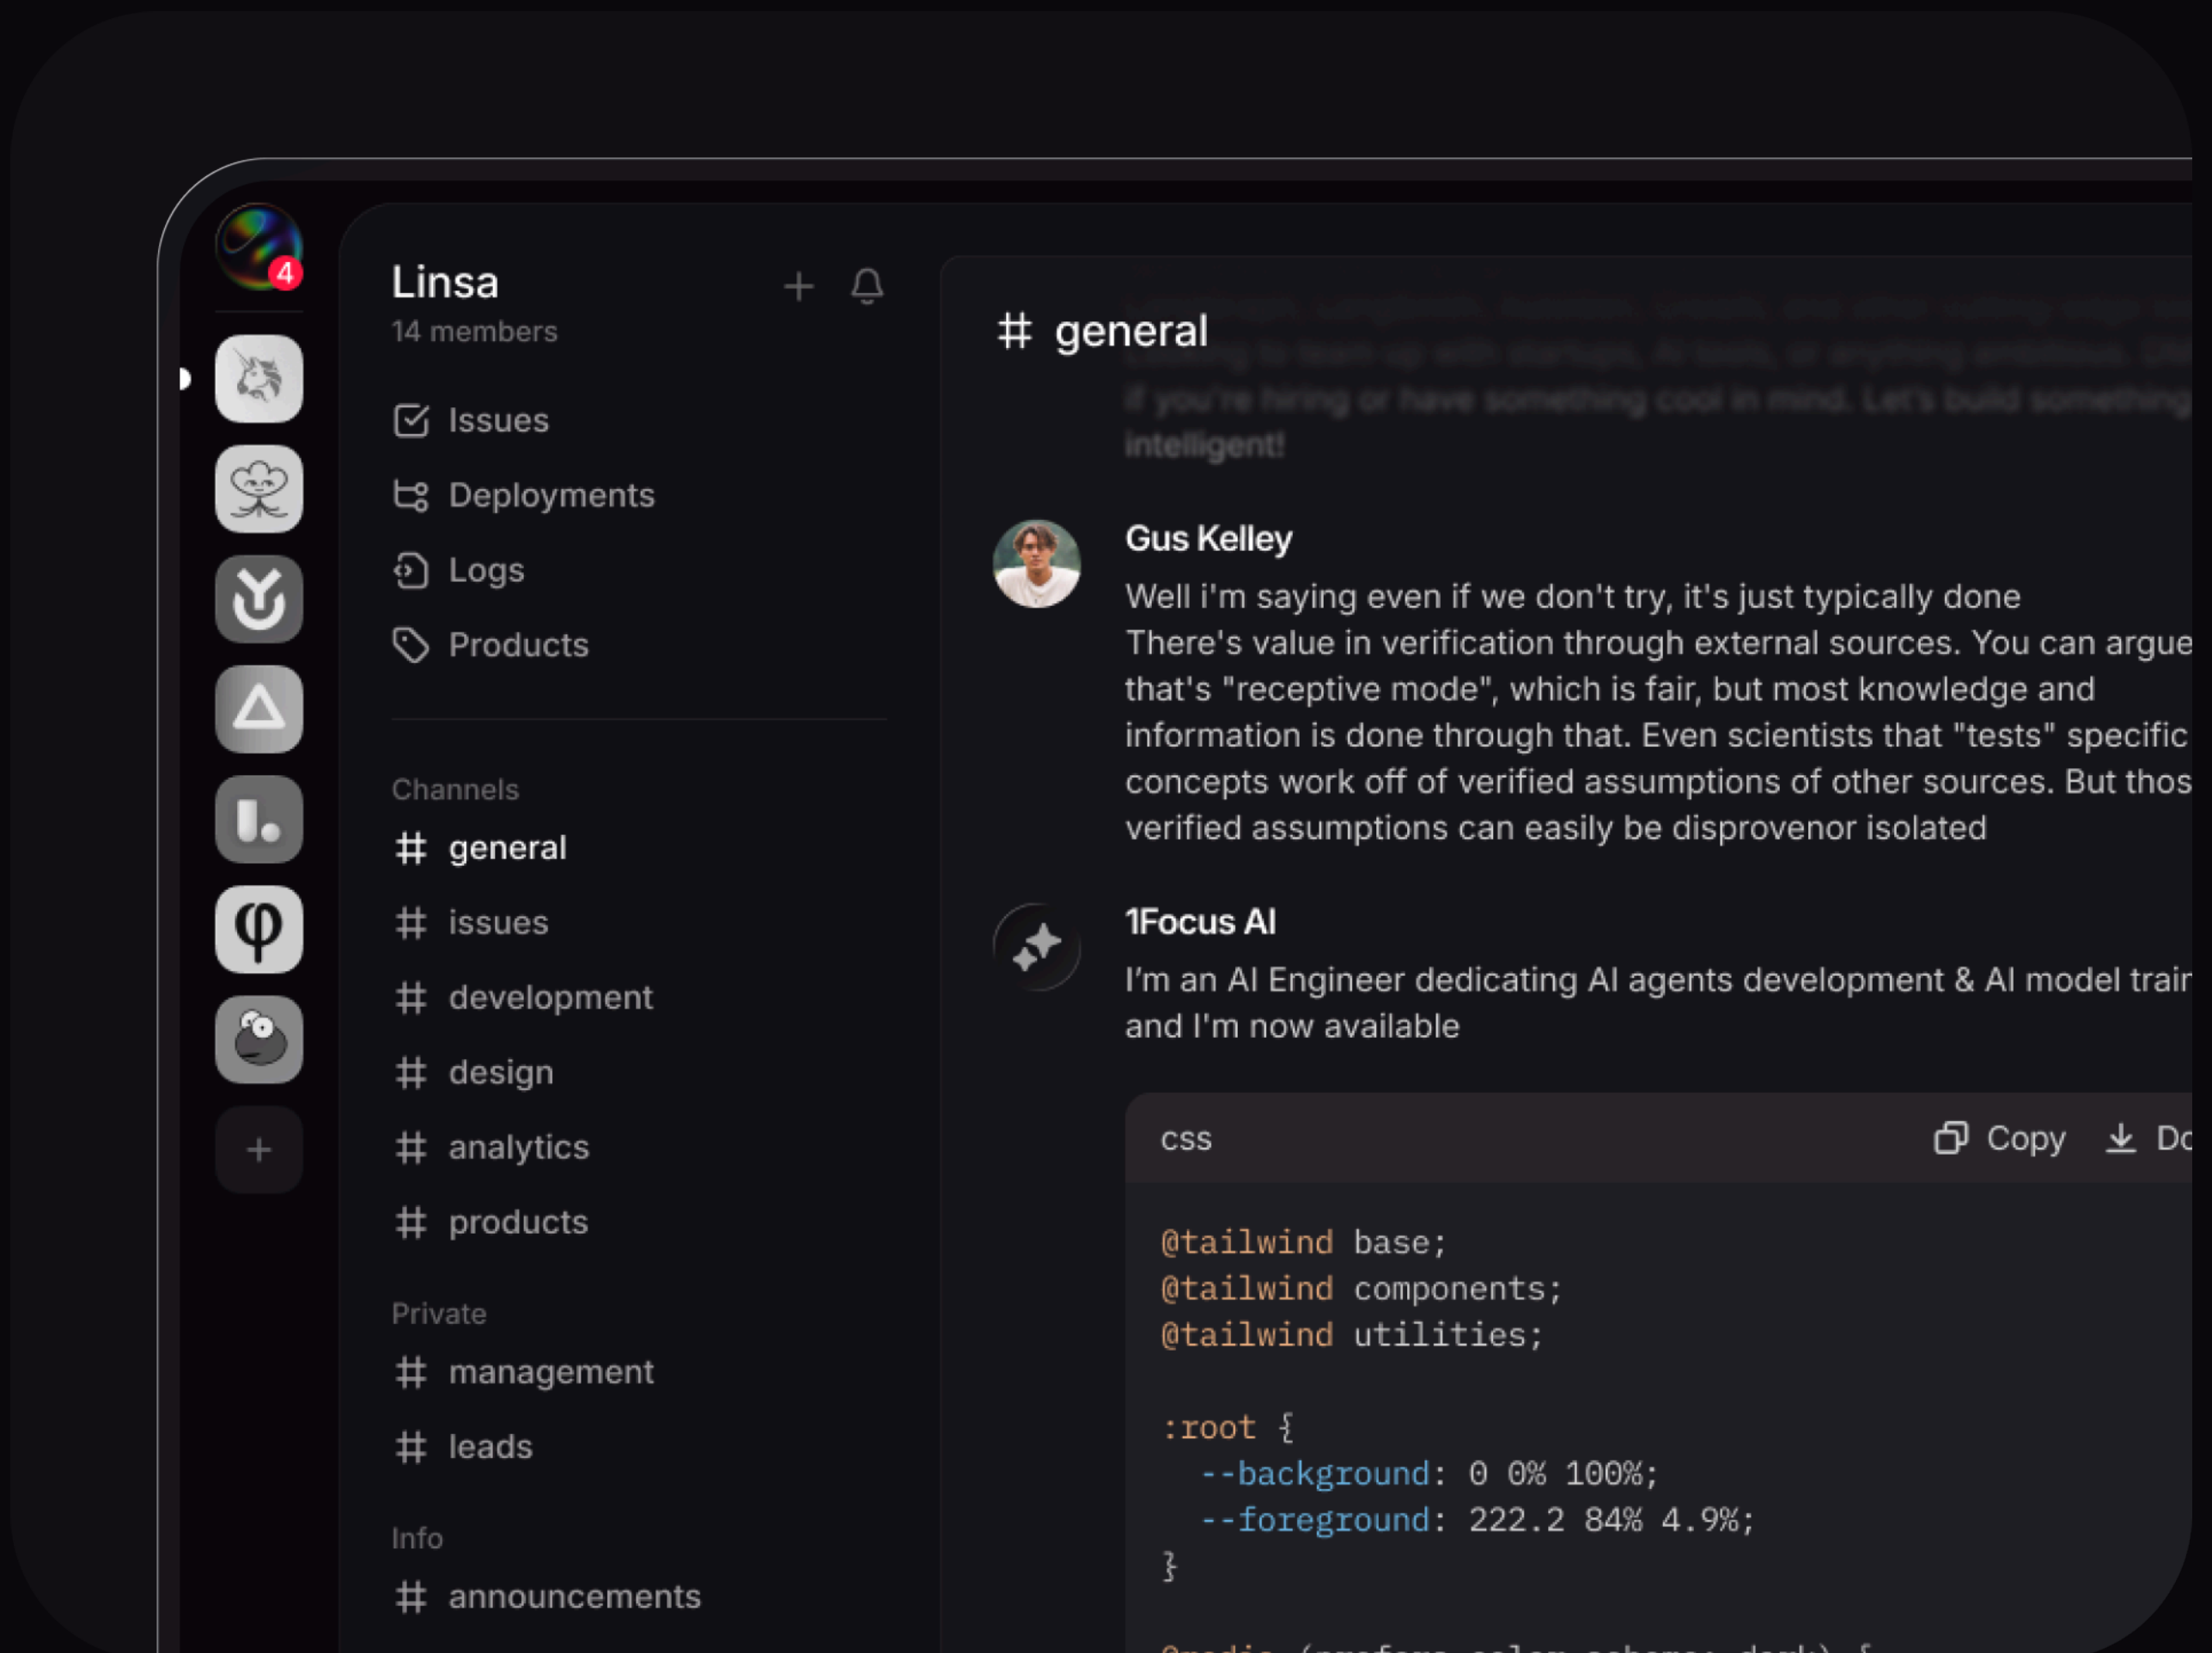

Spaces

Ready-to-Use Business Solutions

CRM, HR, projects, finance, and support —
dedicated spaces with built-in integrations

Adaptive Platform for Any Task

Ready-to-Use Spaces

CRM, HR, projects, finance, and support — specialized spaces with pre-configured integrations

Flexible Integrations

Connect Salesforce, Jira, QuickBooks, Stripe, and other services via APIs and webhooks

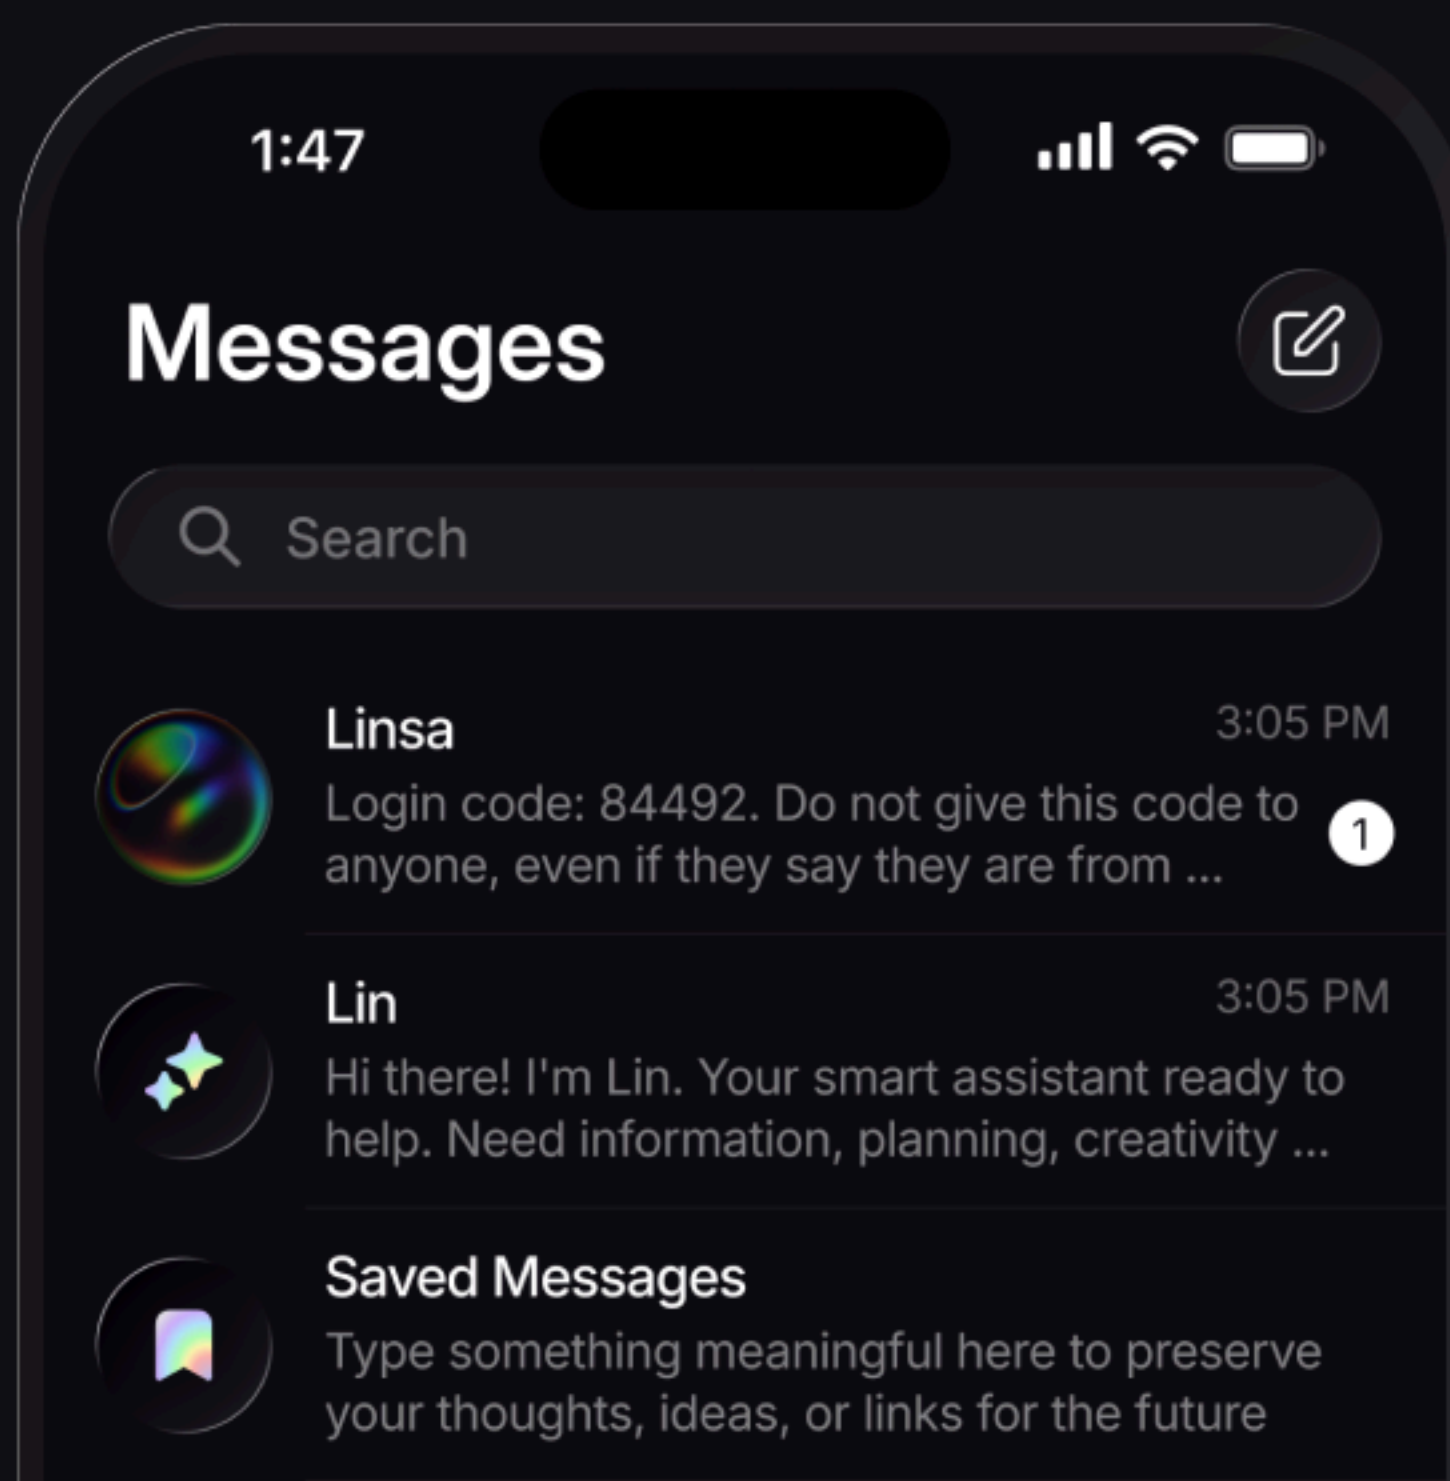

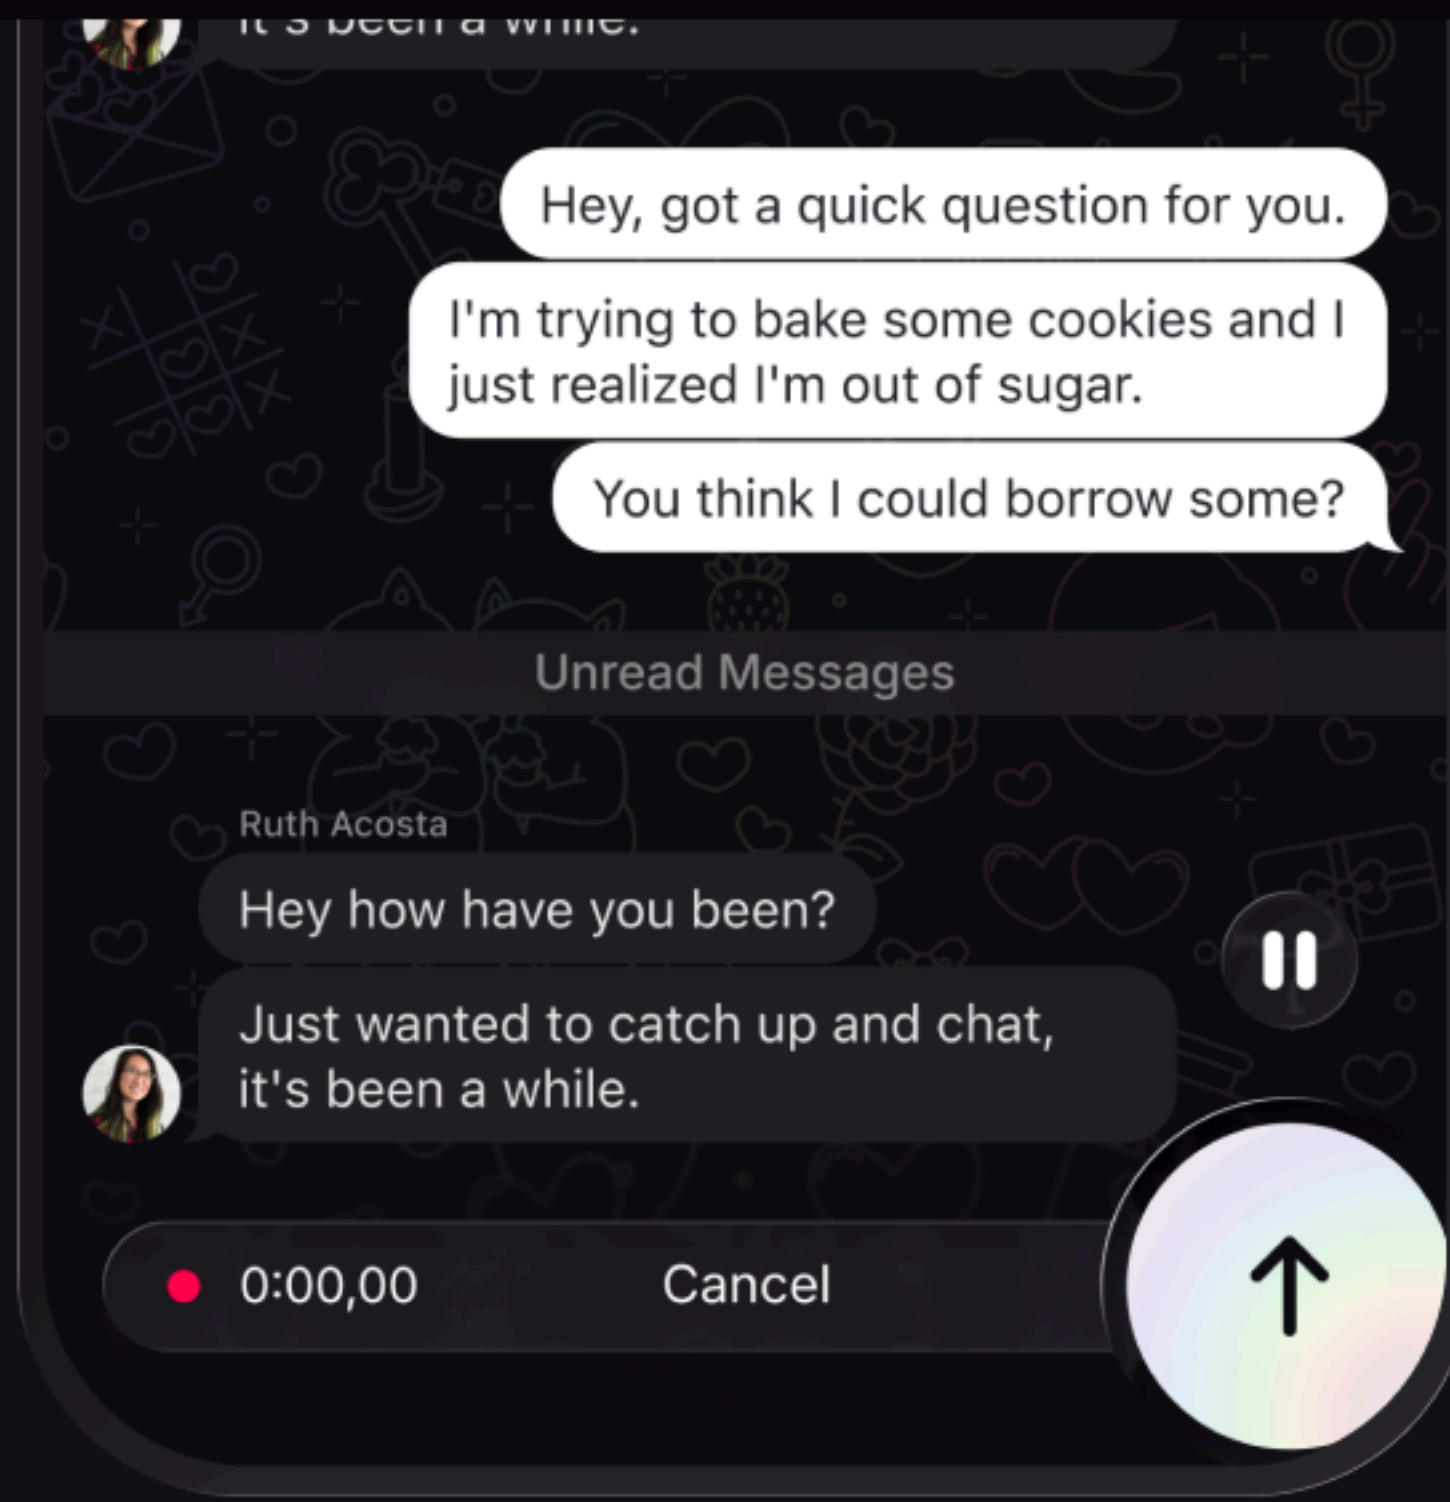

Custom Workflows

Create unique automation scenarios using the AI Assistant and a visual builder

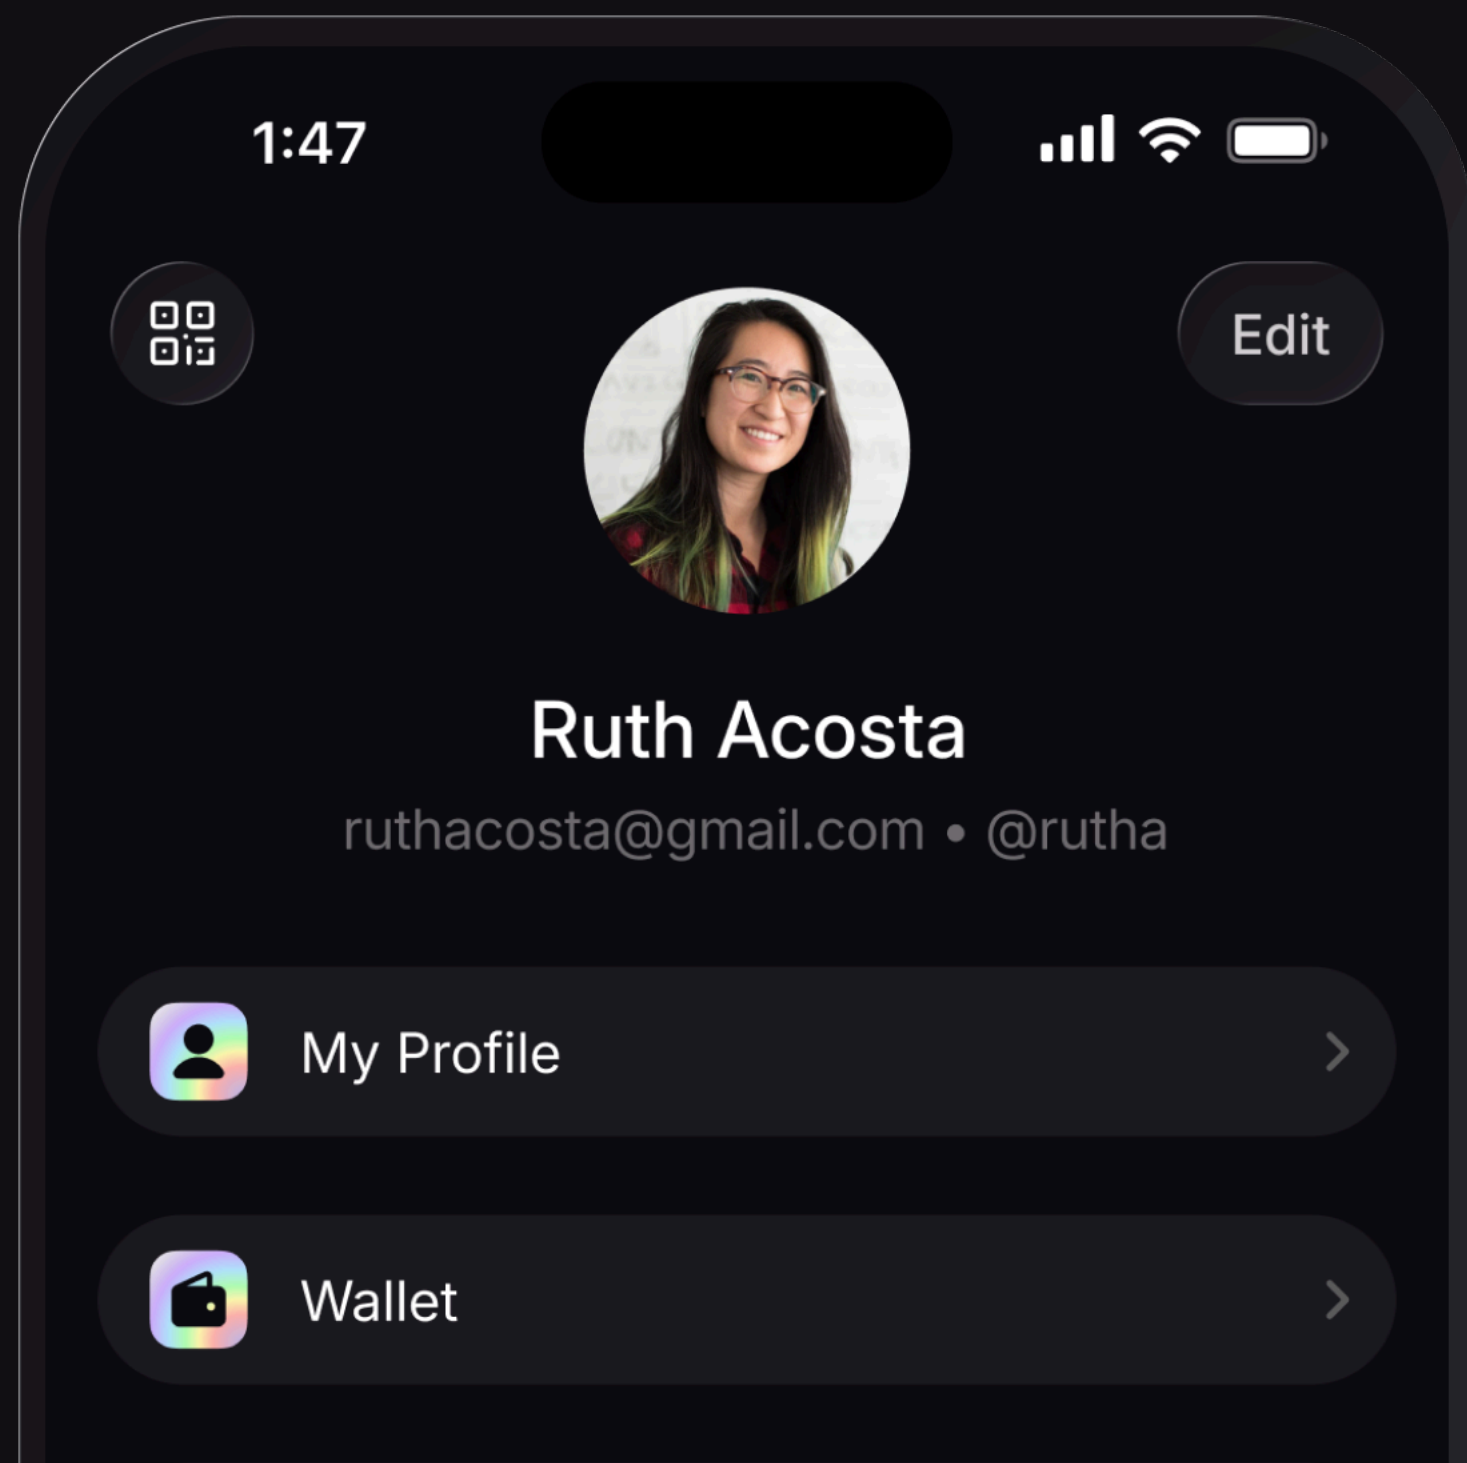

Chats

Communicate and Work in One Place

Online statuses, chat lists, user search, end-to-end encryption, and sharing of text, links, and images

Smart Communication Management

Authorization & Account

Fast registration via OTP by email or phone, with multi-factor authentication

Voice Messages

Record, send, and auto-transcribe voice messages in real time

Contact Management

Create QR codes for adding contacts, import contacts, categorize, and manage privacy settings

Multi-Tier Revenue Model

Wallet Fees

Primary revenue from each transaction, bridge, and swap within the ecosystem. Fees range from 0.1% to 1%, depending on operation type and volume

Business Subscriptions

Plans for teams and companies with access to advanced features: Spaces, dashboard, analytics, and priority support

Personal Subscriptions

Access to full AI Assistant features, advanced wallet settings, and higher limits for individual users

Spaces & Integrations

Additional revenue from premium Spaces (CRM, HR, Finance), custom integrations, and third-party marketplace solutions

Product Development Stages

Alpha Version

- ✓ User profile and settings screen
